Experience

2021 - Present
Wonderslate Technologies - Bengaluru
Front-end Developer

I was responsible for developing complex and responsive functionalities for an ed-tech product. I also worked with Android & IOS team for handling webview, also completely developed a WebRTC (Using Peer.js library) functionality for an app called **Prepjoy - Current Affairs (**Wonderslate product).

I have also build some personal projects to enhance my web development skill

Personal Projects

Forkify : A recipe finder web application, this web app fetches more than 100k recipes and procedures to cook. Developed using JavaScript and forkify API
Demo : https://forkifyy-recipes.netlify.app

Subi's Stay : A web app for booking hotels, this is build using Javascript, Firebase and Bootstrap. Demo : https://subistay.netlify.app

GitHub Finder : GitHub finder is a site to search a GitHub user. Fetches the github users profile and their recent public repositories, public gists and followers count. Designed using Bootstrap, JS and GitHub users API.
Demo : https://githubfinderr.netlify.app

Tracalorie : A web app that tracks your calories and persists the data in the local storage and will display whenever you need it. It is developed using JavaScript and bootstrap
Demo : https://tracaloriee.netlify.app

All these are prototyping apps to experiment, enhance and to level-up my skill.
